SUMMARY

Motivated 2nd-year IT student and Junior Front-End Developer with a strong passion for technology and community building. Experienced in developing modern web applications and collaborating effectively in tech hackathons. Dedicated to leveraging my technical background, communication skills, and leadership potential to empower my peers, foster a vibrant tech community, and create a positive impact.

WORK EXPERIENCE / INTERNSHIPS

Codveda Technologies (Remote)

06/2026 – 07/2026

- Developed **Stellaris**, a futuristic dynamic Space Command Terminal, successfully delivering all required internship tasks across 3 progressive evaluation levels.
- Engineered interactive user interfaces using **React.js** and **TypeScript**, focusing on seamless user experience (UX) and clean software architecture.
- Integrated complex public REST APIs to fetch and stream real-time data, implementing advanced error boundaries and handling asynchronous states gracefully.
- Optimized web application performance through payload minification, asset compression, and modern image delivery configurations to reduce render-blocking resources

SKILLS

- **Languages:** HTML5, CSS3, JavaScript (ES6+), TypeScript.
- **Libraries & Frameworks:** React.js, Next.js, Three.js, React-Three-Fiber, Next.js, Tailwind CSS, Framer Motion.
- **State Management & Backend Services:** Context API, Firebase (Auth, Firestore, Storage), Node.js, Express.js.
- **Tools & Professional Skills:** Git, GitHub, RESTful APIs Integration, Responsive Web Design, Performance Optimization.
- **Soft Skills:** Effective Communication, Leadership, Teamwork, Public Speaking, Community Building, Problem Solving.

PROJECTS

Egypt Holiday Aswan (Commercial Client) 📄

React.js, TypeScript, Tailwind CSS, Express.js, Node.js

- Developed and deployed a complete, multi-page tourism web platform from scratch tailored for a commercial client using React, TypeScript, and Tailwind CSS.
- Built a custom backend service using Express.js and Node.js to handle user booking inquiries and manage form submissions efficiently.
- Configured production deployment, domain hosting via Namecheap, and implemented technical SEO (sitemaps, meta tags) to ensure successful Google Search Console indexing.

Stellaris – Space Command Terminal 📄

React.js, TypeScript, Three.js, React-Three-Fiber, Tailwind CSS, Framer Motion

- Architected a fully interactive 3D Solar System using **Three.js** and **React-Three-Fiber**, integrating planetary shaders, realistic texture mapping, and calculated orbital paths.
- Developed a highly responsive "Bento UI" cyberpunk-styled dashboard utilizing **Tailwind CSS** and **Framer Motion** for tactical screen transitions.

- Integrated **NASA REST APIs** to fetch and dynamically display live cosmic data and high-resolution space imagery.
- Implemented strict, real-time client-side form validation with dynamic feedback and input focus/blur events for complex booking interfaces.
- Conducted thorough performance engineering based on Google Lighthouse audits, establishing a tailored WebGDBoundary to optimize main-thread tasks on lower-end devices.

InstaClone Full-Stack

React Web App with Real-Time Database & Firebase Auth

- Developed a high-performance Instagram clone featuring Google Authentication and a fully responsive profile grid styling with Tailwind CSS.
- Implemented real-time features including likes and comments, utilizing Firebase for database management and live updates.
- Integrated Firebase Storage for image uploads with interactive progress tracking and optimized performance using infinite scrolling for seamless feed navigation.
- Managed local and global application states effectively to ensure smooth user interactions and data consistency across components.

Moxx App

Cinema & Media Discovery Platform

- Built a modern, high-performance web application designed for cinema lovers and TV show enthusiasts.
- Integrated RESTful APIs to fetch and display real-time movie data, descriptions, and ratings.
- Designed a visually immersive interface that simplifies content discovery through an organized layout.
- Optimized application performance and ensured a fluid user interface with React components.

EDUCATION

Bachelor of Computers and Information Technology

Egyptian E-Learning University (EELU)

09/2025 – Present

Aswan

CERTIFICATES

Advanced Front-End Using React 

Organization: Dandara Al Ebdaa (ITIDA / TIEC)

Developing Front-End Apps with React 

Organization: IBM (via Coursera)

Introduction to Software Engineering 

Organization: IBM (via Coursera)

Introduction to HTML, CSS, & JavaScript 

Organization: IBM (via Coursera)

ACHIEVEMENTS

AI Hackathon 2026 (RAG System)

3rd Place Winner – Collaborated with team CTRL+Z to develop "GlycoLens," a medical AI project.

1st Place Winner - AI Track (EELU Student Branch)

Developed a Machine Learning Car Price Prediction application using Python and Streamlit, securing 1st place in the university's technical competition.
